BEng, Software Engineering
2024 – 2027 (expected)

Buling TSS

Software Development
2019 – 2023

LANGUAGES

Kinyarwanda — Native
English — Fluent
French — Basic

PROFILE

Software Engineering student at Adventist University of Central Africa (AUCA) and freelance web developer on Upwork. Experienced in building full-stack web and mobile applications with React, Next.js, Node.js, React Native, PHP, and Python, backed by PostgreSQL and MySQL databases. Comfortable across the stack, from UI development to backend APIs, with additional working knowledge of computer networking (Cisco/CCNA fundamentals). Motivated self-learner with multiple independent and organizational projects and a consistent GitHub track record.

EXPERIENCE

Full Stack Developer — kLab Rwanda

Jan 2025 – Present

- Professional software development training; hands-on full-stack projects using React, Next.js, PHP, and MySQL.
- Built complete functional systems (library and stock management apps); practiced Git/GitHub and collaborative workflows.

Mobile Application Developer — Icyizere Business Ltd

Mar – Apr 2026

- Built a mobile app to digitize business record management — transaction tracking, data management, and efficiency improvements.

LibraStock — GlobalSoft Ltd

Feb 2026

- Built a library and stock management system with admin monitoring and role-based dashboards.

FREELANCE — UPWORK

Web Development | PHP, Next.js, React, Node.js, PostgreSQL.

Build full-stack web apps, admin dashboards, and role-based systems; develop APIs with PHP, MySQL, and PostgreSQL. Profile: upwork.com/freelancers/~013154f18a9aabc659

OTHER PROJECTS

- Import Tax Management System — Java desktop application with data tracking and reporting.
- GlobalSoft — business website and web application platform, deployed on Vercel.
- Bankos System & POS — banking management and point-of-sale systems (GlobalSoft20).
- Stock Management Mobile App and School Library Web — mobile and web management systems.
- E-Commerce Platform — full-stack Next.js/TypeScript app with Tailwind CSS, shadcn/ui, auth middleware. (github.com/jeanromeo250/E-commerce-websites)
